

## The Simple Way Sound card and "VOX"

There are several ways to Hook up your computer to The radio.  
This is the one that I used at First and then made the interface That allows PTT.

**ABOVE ALL!!**  
Follow the instructions on setting Up your audio in and audio Out, as to high an audio will give You a very poor signal on the air, and you will be advised to lower it.

Most operators will help you Get your unit set up to work properly And that the "IMD" is not over -25

Good luck.
